

Buzz Word is a Young Enterprise company aiming to **create a positive environment by promoting Bees** who are becoming endangered and are currently suffering from Mites and Colony Collapse Disorder (CCD).

We aim to attract children aged 5-6 as children are our future.

Drawing by Mia Gay (age 7)

We are achieving this by writing a series of books based on the Bee colony.

Each Bee has its unique character such as Bee Friendly, Bee Happy, Bee Safe and Bee Active, who will all have their own personal story.

Not only do we hope to promote Bees positively, we hope our books will provide children with at least one positive action.

With each book purchased you will receive a packet of Wildflower Seeds donated by Chelston Nurseries.

Just like the bee community, we have transformed this into a community project and have invited local children to write stories and draw pictures.

Did You Know?

- 35% of all our food is pollinated by bees.
- Only female bees sting.
- There are over 20,000 species of bees.
- Bees live on every continent except Antarctica
